## NEW LASER DUAL 12W PLUS

### *Technical Specifications*

#### **QUICKLASE DUAL 12W+**

Dimensions: 26X15X14cm  
Peso: 2.8Kg  
Laser: GaAlAs Laser Diode  
Wavelength: 810 y 980+-10nm (nanometres)  
Output power: 0.1 - 10W / 0.1 - 20W  
Input power: AC: 100 to 240v, 6.0 amp  
Frequency: 50-60Hz  
Operation mode : continuous or pulsed wave  
10 y 20Hz  
Pulse duration: 50 ms  
**Ref. LASA (12w+)**

The QuickLase Dual system is the only system in the world that combines ultimate ablation and excellent coagulation.

The QuickLase Dual combines the wavelength of 810 nanometres (provides better coagulation and would be preferred in larger area surgeries involving more vascularised tissue), and 980 nanometres (provides better ablation and narrower area involvement and would be preferred in areas where the tissue is less vascularised and/or in areas where narrower tissue involvement is indicated).
